

The Airplane Game – Lean Transformation Simulation

Learn how to make sustained improvements in your business through this engaging lean game.

This practical and hands-on simulation is perfect to inspire your team and build awareness to create more and better value for your customers.

Your own tailored action plan will come alive as you identify your opportunities for improvement and discover the problem solving techniques needed to take them on.

The Airplane Game will help anyone in your organisation:

- understand the benefits of a Lean approach to Continuous Improvement
- see the 8 Wastes and identify opportunities for improvement
- use Kaizen Plan-Do-Check-Act problem solving
- understand why meeting customer needs is critical to business success
- visualise business processes using Value Stream Mapping
- create Continuous Flow, Pull & Kanban Systems
- tackle bottlenecks and balance workloads to meet customer demand
- measure improvement progress

Presenter – Tim Odokeychuk

An accomplished continuous improvement, transformation and change leadership specialist, Tim has proven his value through his career having led dozens of initiatives delivering tens of millions of dollars in savings, exceptional customer satisfaction and sustained growth.

For 20 years, Tim has attributed his organisational success to designing improvements for expected customer value, close stakeholder engagement along with an adaptive approach to strategic and practical problem solving.

The Entrepreneurs' Programme is the Australia Government's flagship initiative for business competitiveness and productivity. It forms part of the Government's National Innovation and Science Agenda.

The Programme uses experienced Advisers and Facilitators, drawn from industry, to ensure businesses get the advice and support they need to improve their competitiveness, productivity and to maximize their growth potential.

Practical support for businesses, researchers and entrepreneurs includes: advice from people with relevant private sector experience, co-funded grants to commercialise novel intellectual property in the form of new products, processes and services, funding to take advantage of growth opportunities, and connection and collaboration opportunities.
